

## Ideation Phase

### Empathize & Discover

Date	19 September 2022
Team ID	PNT2022TMID00904
Project Name	Web Phishing Detection
Maximum Marks	4 Marks

### Web Phishing Detection:

Phishing is a social engineering attack that aims at exploiting the weakness found in system processes as caused by system users. For example, a system can be technically secure enough against password theft, however unaware end users may leak their passwords if an attacker asked them to update their passwords via a given Hypertext Transfer Protocol (HTTP) link, which ultimately threatens the overall security of the system.
